The Preferred Bait

Exterminex will definitely be "The Preferred Bait" for your corporation with the objective of exterminating termite colonies permanently.

The bait that work for you

THE STUBBORN DWELLERS

Termites can be one home owner's biggest worry by far. They work relentlessly day and night foraging food. And before you know it, termites have invaded your home completely and destroying your beloved premise. Usually by the time you realize, the damage is already too late to rectify. They have already started hogging onto your expensive timber, structures and fittings.

With our latest revolutionary baiting system, the newly improvised formula plays an important role by intercepting the termites even before reaching your beloved premise in the most non-evasive manner. This state-of-the-art monitoring system will give home owners a piece of mind that their home is safe from termites' invasion.

solution for home owners

HOW DOES THE BAITING SYSTEM WORK?

Until today, most of the solution available in the market for subterranean termite control are the conventional approach of barrier treatments with the use of chemicals. Our approach is to replace the conventional termite method with ExtermineX state-of-the-art baiting system.

This approach essentially destroys termites foraging in and surrounding the structure with small amounts of toxicants at a time.

This is a simple process shown in exhibit a & b

Exhibit A is an illustration of how our ExtermineX In Ground (IG) Bait Station is being installed onto your nearby premise. Approximately 3 meters apart surrounding your home. Once this has been installed, monitoring thus begins.

Exhibit B represents our ExtermineX Above Ground (AG) Bait Station. Simple and easy 3 step procedure to install on infested walls or fixtures. Soon enough, termites will start entering and feeding on our newly improvised termite bait

THE SYSTEM THAT DELIVERS A SMALL AMOUNT OF INSECT GROWTH REGULATOR TO ELIMINATE THE WHOLE POLLUTION OF TERMITES IN AND AROUND YOUR HOME.

WHY SHOULD I USE ExTermineX™

- Proven strong track records of colony elimination success rates
- More than 80% of the major species that are known to destroy homes feed actively in our termite bait matrix

Termite baiting is a simple process and can be used as a preventive measure EVEN when termites are not visible in your home yet.

Termites foraging the bait and building mud in the bait station.

Structure damage caused by subterranean termites
